

World Without War Conf  
VN + the Opinion - makes

William Corson

19 Nov 81

Feature report from Hoover was

"A complete set of PP has been  
given to the Embassy."

Explanation on "complete" — meaning,  
not just negots - vols, but the SI volumes  
on negots (also on '50's)

which revealed a "treasonable"  
dealing with the enemy by CB — known about  
by RMN and Maffei of him: offering  
cash (to NVNem?), though not authorized  
by Congress.

N was afraid that Soss — or someone  
(HAK?) else — could use info to  
blackmail Nixon — get him impeached.

Thy thought I might have gotten  
SI — P.C.S. from Clifford, who had to have  
sprung brick wall put into a closet safe  
to hold his SI-PP. (McN refused SI part —  
sent to Andrews). Corson was asked (by Krogh?)

of Colson? (whom Corson knew as a Marine,  
whom Corson came back from VN: Colson was  
CC). "Can you get docs from Law Embury?"

Corson said: and by taking with gas,  
~~the~~ in basement, blowing up Embury:  
fire department goes in, gets docs.

[Talb.? Brookings? see HRH on  
N and Talb.: Was Corson source of this?]

But  
to plumbers did do "firing Bushi-like"  
entry into Law Embury: kindly, McCard (1971!)  
+ Paisley!).

Corson now thinks "he" was subjected to  
KGB disinformation by Fedora (Wf? maybe...  
to distract him from something else...

"I was the original plumber..."

Corson so

Corson: Says (3) he has read 4 messages  
onarkin Gulf. "Are they all on  
Aug 4?" "I can't say."

More important: our listening post  
in Thailand had Hanoi messages to  
(Iran?)

Moscow, describing whole episode

Corson concludes that our ships  
were firing at each other on the night  
of Aug. 4.

Anthony S

Patch, of US News - World Report, is pretty  
out a book in July: he has "proof" that  
messages were from Aug 2.

("Austin had computer" "I have proof.")

Bader's chair

Corson and Austin both tell me, Bader now  
has proof. (Corson: "In Carter's second term, Bader would  
be the one to...")
